USA, UK, UAE, India, KSA, Kuwait, Africa, Europe, Hong Kong, Australia

CE stands for “Conformité Européenne”; French for ‘European Conformity’. The CE mark is mandatory for products which fall under one of 24 European directives. It is essential for a manufacturer to affix the symbol to a product that is to be sold in Europe.

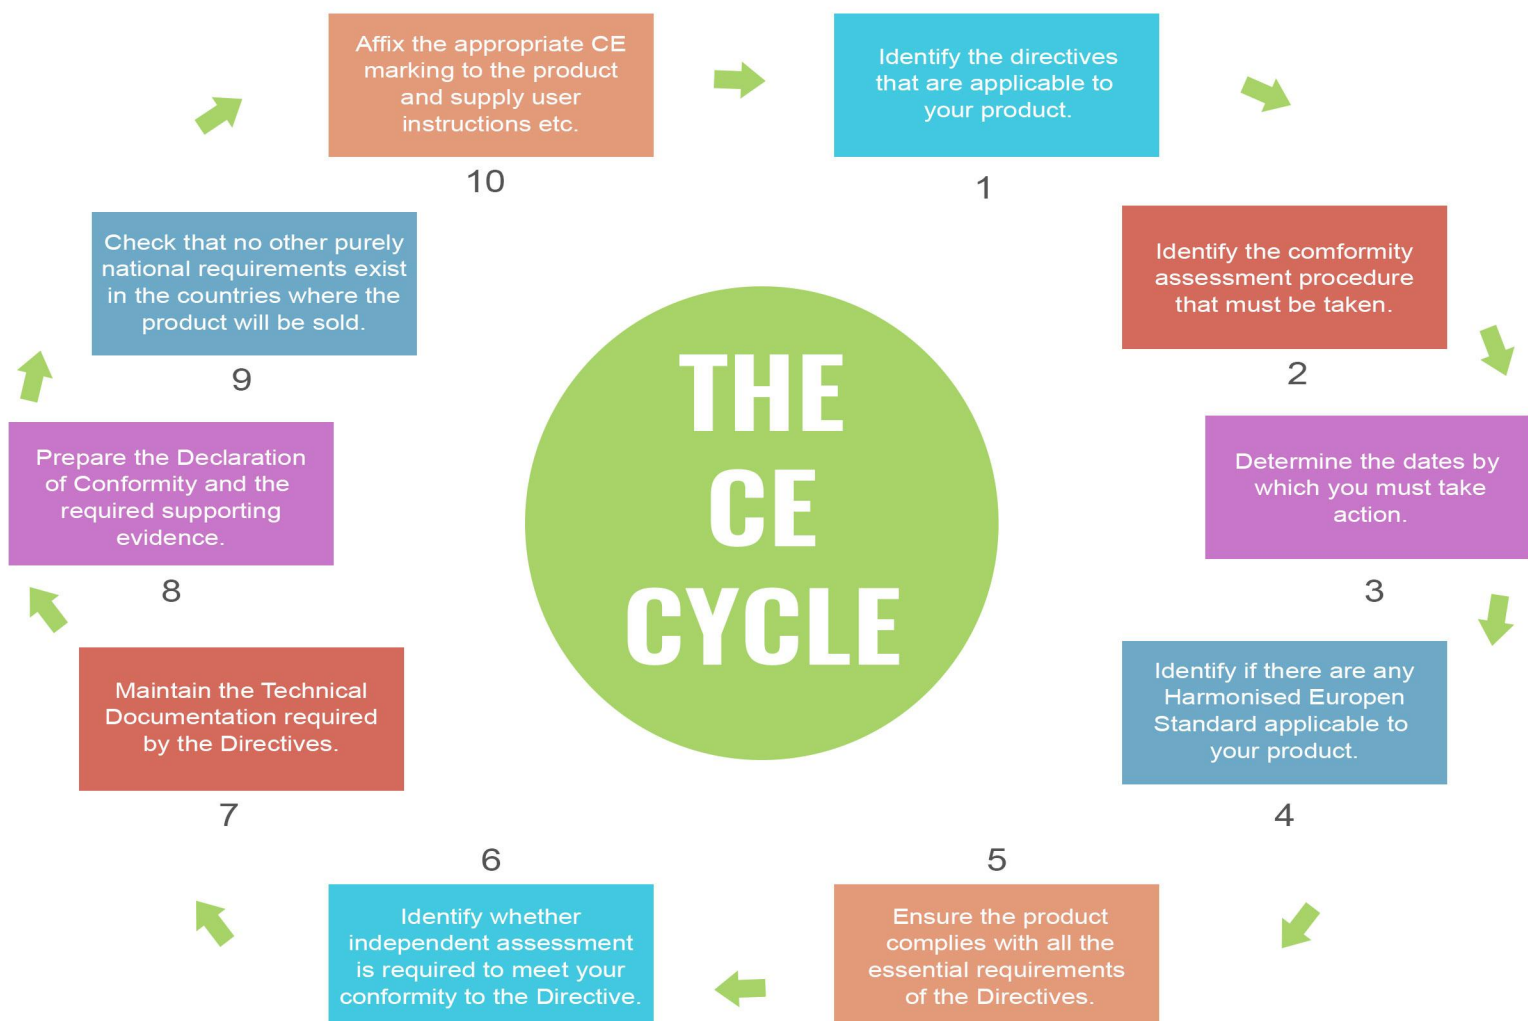

The CE Marking on a product is a manufacturer's declaration of responsibility that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

General principles of the CE marking

- The CE marking shall be affixed only by the manufacturer or his authorised representative.
- The CE marking shall be affixed only to products to which its affixing is provided for by specific Community harmonisation legislation, and shall not be affixed to any other product.
- By affixing or having affixed the CE marking, the manufacturer indicates that he takes responsibility for the conformity of the product with all applicable requirements set out in Frelevant Community harmonisation legislation providing for its affixing.
- The CE marking shall be the only marking which attests the conformity of the product with the applicable requirements of the relevant Community harmonisation legislation providing for its affixing.
- The affixing to a product of markings, signs or inscriptions which are likely to mislead third parties regarding the meaning or form of the CE marking shall be prohibited.

The CE Marking Cycle:

Types of products eligible for CE marking are:

Toys, Pressure vessels, Medical devices, Personal protective equipment, Telecommunications, Pressure equipment, Non-automatic weighing Instruments, Equipment and protective systems for explosive atmospheres, Measuring instruments, In-vitro diagnostic medical devices, Electrical products, Construction products, Satellite station equipment, Machinery, Lift Machinery, Gas appliances, Appliances (other than gas), Recreational craft, Marine equipment

Benefits of CE Marking

- The CE marking is certification that enables a manufacturer to conduct trade with the European market. It allows the manufacturer to freely circulate their product throughout the 30 countries of the European Economic Area (EEA).
- The manufacturers now have only a single set of requirements and procedures to comply in the EEA, for designing and manufacturing a product.
- It standardized requirements and safety norms for the product across a larger user base, reducing customer dissatisfaction, damage and liability claims.
- Customers prefer the use of products displaying a CE marking; a mark of reliability.

We partner with your organization to achieve CE Marking :
