# INTRODUCTION

AS9100 is a widely adopted and standardized quality management system for the aerospace industry. It was released in October, 1999, by the Society of Automotive Engineers and the European Association of Aerospace Industries. Major aerospace manufacturers and suppliers worldwide require compliance and/or registration to AS9100 as a condition of doing business. For the aerospace industry and its suppliers, AS9100 Revision C (Quality Management Systems Requirements for Aviation, Space, and Defence Organizations) represents important and imminent choices. The first, and perhaps most difficult, is to summon the commitment needed to take action. Once this occurs, the auditing and certification process can proceed with less time, expense and trouble than many organizations anticipate. This informative whitepaper from Lakshy Management Consultants Pvt. Ltd. will help organizations prepare for a smooth transition to AS9100 Rev C through an auditing and certification process.

## ORIGIN AND EVOLUTION OF ISO AS 9100 STANDARD

**AS9000  
(1997)  
Aerospace Basic  
Quality System  
Standard**

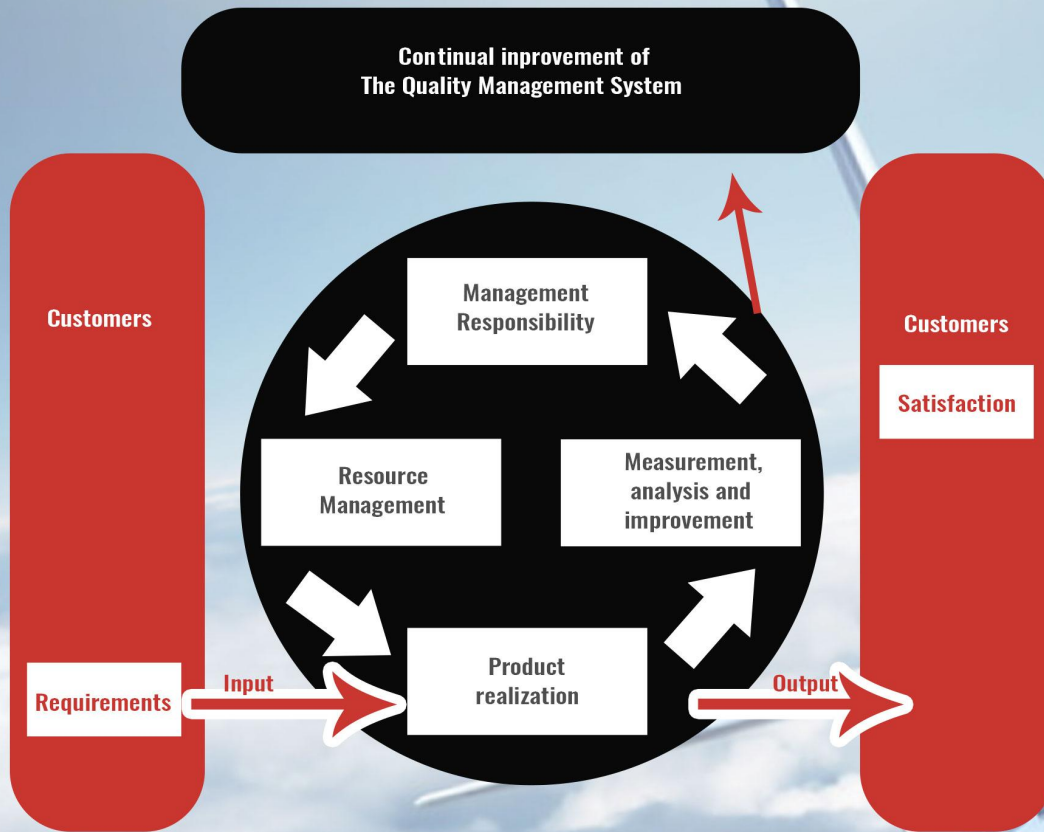

**AS9100 Revision A  
(2001)  
Model for Quality Assurance  
in Design, Development,  
Production, Installation  
and Servicing**

**AS9100 Revision C  
(2009)  
Quality  
Management Systems  
- Requirements  
for Aviation,  
Space and Defense  
Organizations**

**AS9100  
(1999)  
based on ISO  
9001:1994(E)**

**AS9100 Revision B
